Acme Bioscience is a chemistry based CRO, and we have two sites to support your business, San Francisco and Shanghai. Acme Bioscience provides services from medicinal chemistry to process research and development. The medicinal chemistry effort includes hit confirmation, hit to lead generation, SAR studies, and lead optimization. The process chemistry support involves route selection and optimization. Other services include custom synthesis of reference compounds, metabolites, impurity markers, intermediates, building blocks, and small libraries. In addition, Acme Bioscience offers Regulatory CMC consulting services to pharmaceutical companies including strategies and submissions for INDs, IMPDs, CTAs, NDAs, and post market approval applications as well as clinical trial applications and drug registration in China. Acme provides DMPK service with our partners KBI (Kunming, China), and Harmonia (Tianjin, China). We provide chemical manufacturing service with our partner Buddy Bio-pharm intermediates Ltd (Anhui, China). Established in Belmont, California in 2001 Relocated to Palo Alto, California in 2007 Established China Partnership in 2009 Medicinal Chemistry: Shanghai Zhang-Jiang Hi-Tech Park in vitro and in vivo DMPK: KBI (Kunming); Harmonia

(Tianjin) Custom manufacturing: Buddy Bio-Pharm (Anhui)
