

Aglyco Adhoc Intertek

ASIA-PACIFIC

Phone: +86 10 87855580

At Aglyco, we primarily focus on titer reagents of heparin for laboratory experiments and research. We are a professional vendor of detection reagents used in the production of heparin, LMWH, and chromogenic substrates during the quality control stage, also developing its own chain of professional equipment and tools (MPMS - multifunctional plasma mutagenesis system). Our flagship products are Heparinases I-III, Chromogenic Assays, Chondroitinases AC and B, as well as others. We continuously supply Heparinases I-III (for research use only) in small quantities (0.1 IU or 1 IU). Heparinases I-III are natural enzymes, isolated from *Flavobacterium heparinum*. These enzymes have high stabilities, especially Heparinase II. Our Heparinases have: Long term storage >1 year at -20 °C or below Purity (HPLC) > 99% Ready-to-use formulation with simple protocols Suitable for tissues cryopreservation Lead time: In stock, 2-3 weeks for delivery Please note that our products are not intended for direct human consumption. Below I have listed our products. Their catalog number and details are also listed for your

reference:	Catalog#	Description	AG00-2519	Heparinase I, from <i>Flavobacterium heparinum</i>
			AG00-6512	Heparinase II, from <i>Flavobacterium heparinum</i>
			AG00-8891	Heparinase III, from <i>Flavobacterium heparinum</i>
	AG00-0101	S-2238, Chromogenic Substrate for Thrombin		
	AG00-0102	S-2765, Chromogenic Substrate for Factor Xa		
	AG00-0121	Activated Factor X (FXa), from Bovine Plasma	AG00-0122	
		Alpha-Thrombin (FIIa), from Bovine Plasma	AG00-0131	Antithrombin (AT), from Bovine Plasma
	AG00-0132	Human Antithrombin	EZ006K	Human Thrombin

Aglyco is a manufacturer and distributor of lab reagents. We strive to assist your research and development by supplying quality chemicals. Our high quality products and appealing prices will surprise you!
