Cleanroom Connection is the leading pharmaceutical cleanroom supplier and specialized one-stop source for pharmaceutical cleanroom products. Supplies for pharmaceutical cleanroom maintenance Cleanroom supplies include a hand-picked selection of lint free non-shedding cleanroom wipes, sterile cleanroom apparel, sterile isopropyl alcohol and other cleanroom disinfectants, sterility testing products such as media fill test kits and contact plates, as well as all other cleanroom supplies and products used in the daily maintenance of a pharmaceutical cleanroom. US Pharmacopeial Convention (USP) 797 pharmacy compliance along with USP 800 training and compliance are a specialty of Cleanroom Connection, with the support of associates at Pharmacy Compounding Accreditation Board (PCAB), the USP, US Food and Drug Administration (FDA) and veteran consulting compounding pharmacists who are available to answer technical questions for Cleanroom Connection clients. Cleanroom Connection stands out from other cleanroom suppliers due to personal, pharmacy cleanroom-trained customer service, customized cleanroom product supply chain solutions and vast resources for its customers including direct contact with technical experts at all of the manufacturers it is authorized to sell for, including Decon Labs, DuPont, BioClean, Texwipe, Kimberly Clark, Covidien, CT International, Criti-Clean, Micronova, Hardy Diagnostics, Veltek Associates and other high-quality cleanroom supplies manufacturers. Cleanroom supplies for compounding pharmacies and pharmaceutical manufacturers Cleanroom supplies include all the cleaning products, pharmacy supplies, apparel, disinfectants, contamination control products and other

related items that are required to maintain the cleanliness of a cleanroom. Cleanroom Connection is the leading supplier of cleanroom supplies and cleaning products in the US, specializing in the pharmaceutical industry. Working as a master distributor for the highest-quality cleanroom product manufacturers, only highly reviewed cleanroom supplies are offered based on customer reviews and in-house evaluations. Unlike cleanroom suppliers that blindly sell thousands of similar cleanroom supplies, the cleanroom products offered by Cleanroom Connection are a hand-picked selection. Get friendly, personal customer service when shopping for cleanroom supplies, as well as learn from other customers reviews. Cleanroom apparel and sterile cleanroom clothing Disposable cleanroom apparel styles include coveralls, bunny suits with attached hood and boot covers, lab coats, frocks and gowns. These non-shedding cleanroom garments are available in DuPont Tyvek, microporous-coated, SMS fabrics and other similar cleanroom-safe materials. Launderable cleanroom apparel including polyester, nomex and C3 cleanroom coveralls and other apparel styles are available, as well for those facilities that prefer to launder cleanroom clothing. Sterile cleanroom apparel, including the popular DuPont IsoClean Tyvek line is stocked at Cleanroom Connection in all styles, sizes and packaging options. Sterile tyvek coveralls with attached hood and boot covers are quickly becoming the garment of choice for aseptic pharmaceutical clean rooms due to maximum skin coverage and unbeatable protective properties of sterile tyvek coveralls. Non-shedding lint free wipes and sterile cleanroom wipes Lint free wipes, also referred to as non-shedding wipes, are used to wipe down all surfaces in a cleanroom. These cleanroom wipes are often made from nonwoven blends of polyester and cellulose, or laundered polyester. Cleanroom Connection stocks the highest-quality cleanroom wipes from top manufacturers such as Criti-Clean, Texwipe, KimTech and other well reviewed lint free wipe manufacturers. Nonwoven cleanroom wipes are the most popular pharmacy wipes due to high absorbency, economical pricing and low-linting properties. Sterile cleanroom wipes are becoming more popular in pharmacy cleanrooms due to the increasing need for sterile environments. Cleanroom Connection offers sterile lint free wipes in nonwoven form, as well as sterilized polyester cleanroom wipes. For those looking for the ultimate convenience,

sterile pre-saturated isopropyl wipes, sterile peroxide wipes and sterile sodium hypochlorite wipes are now top-sellers at Cleanroom Connection. Sterility testing, media fill tests and contact plates Low-risk, medium-risk and high-risk media fill test kits are used to evaluate the proficiency of pharmacists and pharmacist technicians under compliance with USP 797 and test for sterility under USP 71. Cleanroom Connection is the leading source for Hardy Diagnostics media fill test kits that will assess the risk of microbial contamination of compounding sterile preparations (CSPs) according to USP Chapter 797. Contact plates, slides and other microbiology products are available to all Cleanroom Connection clients at wholesale pricing. USP 797, USP 800 and cGMP compliance Cleanroom Connection specializes in helping both new and existing pharmacies and pharmaceutical manufacturers becoming compliant with USP 797, USP 800 and current good manufacturing practices (cGMP). From small independent compounding pharmacies aiming to become USP 797 compliant to the nation's largest pharmaceutical manufacturers striving for cGMP compliance, Cleanroom Connection has become a vital resource due to its high-quality cleanroom product offerings, cleanroom-trained customer service, and professional partners in the pharmacy consulting, construction, assessment, training and cleaning industries. From custom-tailored USP 797 compliance to on-site cGMP training and implementation programs, Cleanroom Connection will take the time to create an easy-to-understand program to raise business to the next level.
